

# Shelly Ah Yow

About Me

Energetic student eager to gain experience with superior work ethic and good teamwork problem-solving and organizational skills. Eager to gain knowledge in project coordination and willing to take on any task to help the team.

I have a real passion about makeup and hair styling. I am also a passionate of gaming. My two favourite games that i played the most are Genshin Impact and Valorant.

My most important principle is respect as Thomas S. Monson has always said "'When we treat people merely as they are, they will remain as they are. When we treat them as if they were what they should be, they will become what they should be."

My favourite quote: "Life is like an elevator. Up and down, just make sure you get off on the right floor" by Keith Douglas

My favourite bible Quote: The Lord is not slow in keeping his promise, as some understand slowness. Instead he is patient with you, not wanting anyone to perish, but everyone to come to repentance. Psalm 103:8-

One of the most crucial ingredients for success is the discipline to act on what i know is right even when it doesn't feel right; these everyday decisions frequently include accepting accountability for my own judgments and deeds. I am always careful with what i say and do since other people are affected by what i do. I always care for others.

## Web Page Design

### The Idea

Okay, so you have an idea for a website or an assignment due for **Business Web Technologies**. You want to make it look professional and easy to use. What is the first thing you need to work on?

### Content

*Content* is the most important element of a website. Written content, makes up for more than 90% of the Web. The aim of design is to enhance the presentation of the content! Styling content will go a long way.

Okay, so you have an idea for a website or an assignment due for **Business Web Technologies**. You want to make it look professional and easy to use. What is the first thing you need to work on?

#### The content

*Content* is the most important element of a website. Written content, makes up for more than 90% of the Web. The aim of design is to enhance the presentation of the content! Styling content will go a long way.

**id = "content"> Content - HTML**

The aim of design is to enhance the presentation of the content. Content is the most important element of a website.

**id = "content" > Presentation - CSS**

Styling your content will make your website more usable. For websites we use cascading style sheets (CSS)  
CSS is a set of rules that will allow you to style content. The rules are *element* / *style* pairs, which identify the element and how its going to be styled.

#### The Apology Line

[Introducing Foretold: Can a fortuneteller change her future?](#)

Foretold is a deeply engaging podcast that follows the life of Paulina Stevens, a Roman fortune teller as she makes the extraordinary decision to leave her community. In this preview feature we begin with a historic meeting in a cafe where a penniless Paulina meets her fate's assigned shop with her children, that she is a woman with torn and torn, that she was in an arranged marriage and taken out of school in the 18th grade to prepare to be the predestined for her. And as despite the journey to escape each of these chains, learning about the person and culture of Roman people (commonly known as the patronus "Gypsy") along the way. This podcast explores cultural identity, connected to the people's history, Latin and Roman Foretold on <https://bit.ly/foretold> or wherever you get your podcasts.

#### Introducing: The Apology Line

If you could call a number and say you're sorry, and no one would know... what would you apologize for? For fifteen years, you could call a number in Manhattan and do just that. This is the story of the line, and the man at the other end of the line, who became consumed by his own creation. He was known as "Mr. Apology." As thousands of callers flooded the line, confessing to everything from shoplifting to infidelity, drug dealing to murder. Mr. Apology realized he couldn't just listen, he had to do something, and if he wasn't taking everything, from Money to the rules of Q&A and The Street News Doc, comes a story about empathy, deception and obsession. Because Diego, who knew Mr. Apology better than anyone, told him the episode series.

All episodes are available now. You can binge the series ad-free on Wondery+ or on Amazon Music with a Prime membership or Amazon Music Unlimited subscription.

## My Todo List

Task Name:

- ☒ learn Javascript
- ☐ learn HTML
- ☐ learn css

## Education & Experience

**Shelly Ah Yow.**    Second year student.

**High School.**    St Andrews School.

**St Andrews School.**    Jan 2014 till June 2021.

**University.**    Curtin University.

**Bachelor of Commerce.**    Bcom Business Information Systems.

**Lottotech Ltd.**    Software Quality Assurance trainee.

**Lottotech Ltd.**    22 Nov 2022 to 28 Feb 2023.

A hardworking student and an endeavour person.

## My Reflection

At first i did find it hard to learn HTML5 as there were a lot of headers and body to put. For the first three weeks i was lost in writting the codes of different projects did in lectures and tutorials. Now i dont really find this complicated because i atteneded lectures and tutorials. I have been able to understand the concept of html, css and javascript of how it works.

This is interesting as i did found many ways of how to make a website fancy and attractive. In css i can style a webpage in many ways i want. In javascript we can add animation as well as navigations bar to make it more interesting.

The way a webpage is displayed may differ depending on how various browsers parse HTML and CSS code. It's critical to design websites that can adjust to various screen sizes in light of the proliferation of mobile devices. Older browsers might not be able to support certain CSS properties, which can restrict your design possibilities. These are the difficulties that i did find while learning HTML and CSS.

In terms of benefits about learning javascript is that it is a high-performance language with speedy complicated operation execution, JavaScript is ideal for developing dynamic web apps. JavaScript does not need server-side computation, it can be utilized to construct interactive user interfaces. In terms of constraints is that Javascript may be interpreted differently by different browsers, which can cause compatibility problems and make it challenging to develop cross-browser compatible apps.

Before learning html, CSS, and javascript, i was studying Python. The ability to other coding languages was incredibly nice to have more knowledge about coding.

I am having fun building a website using html, css and javascript whether using a template or bulding the HTML code from scratch. After my graduation i can consider to become a web developer and to learn these 3 coding languages in depth.
